

What are the advantages of renewable energy?

They respect the environment

Most do not produce **greenhouse gases** or other pollutant emissions

They are unlimited

They are drawn from **nature's inexhaustible resources** and can be drawn upon permanently

They are safer for our health

They do not emit **gases harmful** to living beings

They offer greater flexibility

They can be **installed anywhere**: boats, motorhomes, homes, buildings, etc.

They do not generate waste that is difficult to treat

They are **easy to dismantle** and do not need to be stored

They promote employment

They create **five times more jobs** than conventional energy

They promote energy independence

They develop the **region's economy**, promoting its autonomy
