

The key figures of global warming

Temperature of the planet

Due to **mankind's activities**, in 2017 the temperature of the planet was already **1°C higher** than it was before the industrial revolution

Sea level

The global sea level has risen **20 cm** since 1880 and it is expected to rise an additional **30 - 122 cm** by 2100

Global CO₂ emissions must be reduced to zero by **2050** to limit heating to **1.5 °C**

A bold **climate action** could generate at least **26 billion** dollars in profits by **2030**

Paris Agreement

It covers a **third** of the CO₂ reductions needed to keep the world below **2°C**

Energy industry

It will create more than **18 million** jobs related to sustainable energy by **2030**
