

Most in-demand digital skills

1 Cybersecurity

Although computer security is a **complex field**, we should at least have a **basic knowledge**.

2 Customer service

Companies value proficiency with third-party service tools, such as **CRMs** or **social media**.

3 Marketing

Knowing how to sell and **manage the contents of a blog** is another of the most valued digital skills.

4 Social media

It is not enough to upload photos and post. We need to learn how to build a **strategy on Twitter, Facebook, etc.**

5 Digital image and video editing

Editing and delivering valuable content through **infographics** or **tutorials** will always be highly valued.

6 Cloud technology and e-commerce

Using **cloud-based tools** with ease or knowing something about **e-commerce** is already essential in many companies.

7 Specific software

Handling **data analysis** or business management programs will be a great help in finding you a job.

8 Web positioning

Understanding how a **search engine works** so that our contents fit in amongst the top results
